

## **"Gripping superpower." "Incredible."**

"I have been a member of the Golf Writers Association of America since 1991, and as you can imagine I have received my share of products to test and review. From clubs and balls to training aids and items that had their own category, I have seen it all. I am a native of New York City, and grew up playing golf in all four seasons. But after relocating to Mississippi about 20 years ago I realized that I was going to face a new challenge almost every time I stepped to the first tee. That is, the heat and humidity are often so intense that just keeping any type of consistent grip on the club was impossible for me. I guess it is just in my genes to have sweaty hands. I tried wearing two gloves and used powders and sprays. Nothing worked. I never felt I could play my best simply because more of my focus was on holding on to the club than actually making the swing.

Then I discovered the Caddy Daddy Talon golf glove and my game changed in a mini second. I am not a scientist or chemist, and have no clue why this glove is so amazing. But with the Caddy Daddy Talon glove on my left hand I feel like I have some type of gripping superpower. The first round I played while wearing it was my best round in years. My swing didn't change. My clubs and balls were the same. The only difference was the glove. My son, who had seen me play with a glove on each hand for years, was stunned, especially since our round took place on the Mississippi gulf coast with a heat index of about 105 degrees and a humidity factor that was off the charts.

Now, finally after all these years I am confident that I can grip my club without any concerns about it slipping or moving in my hands. The fact that the Caddy Daddy Talon glove works so well that I can even play without a glove on my right hand is even more incredible.

Over the years there have been about five products out of hundreds I have received that I can say actually live up to their expectations. The Caddy Daddy Talon glove exceeded even my wildest dreams. Surely, if this glove works for me under such extreme conditions I expect it will work beautifully for any golfer who is looking for an enhanced grip regardless of the weather.

Very simply, the Caddy Daddy Talon glove is a true game improvement product of the highest level."
