#### Overall

CaddyDaddy makes a few golf products. The Talon Glove is what was sent to me. The palm of the glove is shiny. My dad said it looked slippery, but it is quite the opposite. The shiny areas are quite tacky and give you a solid grip on any club.

The overall fit is comfortable. There is a slight (very slight) loose area at the bottom of the knuckles. The fit is flexible and comfortably snug.

The Tack Fusion technology gives the palm a glossy look. The back of the glove is mainly flexible material. The velcro tab folds like it should and lines up. There is a ball marker on the ball like the old school gloves. The stitching holds together well and is breathable in the heat. Even though it only comes in one color combo it is stylish. The price is average compared to most well made gloves. I like the Talon glove. It does not have talons, but it grips like a falcon.

## Kikkor Selects Golf Shoes – Apparel Review

### Kikkor Selects Golf Shoes – Apparel Review

Kikkor [neucrugolf.com](http://neucrugolf.com) review stats:

#### Company

The Selects are our most complete spikeless golf shoe to date. To start, they are unbelievably comfortable, thanks to a soft full grain leather upper and Kikkor Komfort Foam in the tongue and collar. Secondly, they're ridiculously lightweight due to the VEKTRboard™ 2.0 injected EVA outsole. Added to the outsole are durable, lightweight, TPU Traction Platforms providing the golfer with bear-like traction. And lastly, they offer the golfer a classy, yet modern look that they can confidently wear with shorts or pants. If you're looking for the best, look no further than the Selects.
